EAA 154 CH701 Project

Progress continues on the CH 701 with building being done on the rear fuselage.

Having a build session at the RFC Open House was a great success and our members were kept busy answering questions. This was the most interest our chapter has had at any Flying Club open house I have attended.

Budding young builders were also encouraged to help out by placing Clecos as holes were drilled out. This was a real hit with the kids especially when we told them they had to sign the builder's log as being a helper.

This young builder helped out for more than a half hour

Signing the build log book

Future building sessions will be moving to Noel McAvena's garage 3115 Zech Place. Notification will be sent out before the next session.

CH701 Project continued..

Thanks to Wayne Runyon for the use of his garage for the last few months. He has been a great host for the CH701 build sessions to date.
